Sprint 3 : UX Review & Refinement Summary

Project: GP26 Grand Prix Ecosystems Operations Platform

Date: 17 October 2026

Overview

Reviewed the latest vendor form against the UX designs and tested navigation, usability, validation and layout. Additional feedback was provided by Daniel.

Usability Findings & Recommendations

Issue	**Recommended Refinement**	**Priority**
Users can navigate back to the Review page after successful submission.	Prevent users from returning to the Review page after submission. Display "Form already submitted" if they attempt to return.	Medium
Technical fields lack explanations for non technical vendors.	Add short helper text or subheadings explaining technical requirements.	Medium
AGPC Department dropdown displays Option 1, 2 and 3.	Replace placeholders with approved department names.	Medium
Users must clear the existing service selection before choosing another from the dropdown menu(dynamic form page)	Allow users to change their selection directly from the dropdown.	Medium
Review page is centred while other form stages are right-aligned.	Right-align the Review page on desktop while maintaining mobile responsiveness.	Low

Developer Handoff

Dev 1 / Dev 2: Review and implement the recommended navigation, dropdown and layout improvements.

BA: Confirm the correct AGPC Department options and technical terminology.

UX: Review the implemented changes for consistency with the approved designs.

Conclusion

The prototype is generally consistent with the UX designs. These refinements aim to improve navigation, clarity and consistency before final delivery.
